Rich Colors & Texture

Splitface Masonry Units offer designers and contractors the ability to create beautiful projects with our rich colors and textures. A unique combination of elegance and balance gives Splitface Masonry the appeal that customers are often looking for.

Clean Lines & Definition

Scored Splitface Units combined with other textures and colors add bold lines and definition to any building. Decorative patterns are easily produced giving designers flexibility when choosing the right building materials for any project.

Long Life Cycle

Splitface Masonry Units allow Architects to provide their clients with sustainable solutions for years of reliability and beauty. Manufactured to exceed industry expectations, our Splitface products are produced with extremely high standards and quality assurance.
# Splitface Color Selection

Colors may vary. For exact color, contact us for a sample.
PART 1 - GENERAL
Submit color samples for selection from manufacturer's group. Submit product literature, certifications, test reports and full size samples of each color that is specified.

PART 2 - PRODUCTS
PRODUCT NAME
Splitface Masonry Units
Scored Splitface Masonry Units
Fluted Splitface Masonry Units

PART 3 - EXECUTION
LAYING MASONRY WALLS
All Splitface Masonry Units shall be drawn from more than one pallet at a time and must be laid using the best concrete masonry practices. Lay block with the faces level, plumb and true to the mason line strung horizontally at splitface side of the block. Both horizontal and vertical joints should be 3/8” on the finished side of the wall. Joints should be neatly and uniformly tooled after they are finger-hard. Cut pieces should be sized and placed properly to maintain bond and consistency.

MORTAR BED & JOINTING
Units shall be laid with full mortar coverage on head and bed joints without blocking cores. All joints shall be tooled when finger-print hard into a concave shape. Remove mortar from the face of masonry before it sets. Tuck-point all joints of scored units for creating proper appearance. All exterior scored units must be tuck-pointed to prevent water penetration. DO NOT RAKE JOINTS.

FINAL CLEANING
During the installation process, walls should be kept as clean as possible by using brushes, sponges, etc. Never allow excess mortar or smears to harden on the finished surfaces of block. Avoid using harsh cleaning methods that will result in damaged or marred surfaces. Clean finished walls with Custom Masonry Cleaner by PROSOCO. Manufacturer’s instructions should be strictly followed for cleaning including a completed and thorough rinse. Permanent damage to the block could result if the exact instructions are not adhered to.

Note: Consult NCMA TEK NOTES regarding proper installation techniques for concrete masonry.
